Bhopal, dated:7/12/2010

To,

_____ (Address of manufacturer)

Sub: Drug Testing through Health Department approved Drug testing laboratories

As per the Tender ref:003/QC/GoMP/2010-11 dated 22.01.2010 terms and conditions after receiving orders of drugs the manufacturer were supposed to test their drugs & other items in their own labs and subsequently the manufacturers were supposed to send this test report along with the supplies. Further as per the tender terms and conditions the ordering authorities were supposed to send the samples of drugs received to one of our authorized drug testing lab for further checking the quality of the drugs.

It has been observed that the second level drug testing by ordering authority has been irregular which has caused much delay and inconvenience in using drugs and further resulted into delay in payments. So in order to avoid unnecessary delay in testing Health Dept-Government of Madhya Pradesh has taken decision that the manufacturers at the time of manufacture will firstly do testing in their own lab and provide test report to the ordering authorities and manufacturer before supply will themselves send samples of each batch to one of our 9 Authorized laboratories. The test report received from our drug testing laboratories will be obtained by the manufacturer, which will further be sent to the ordering authority along with their supplies.

We are sure that by this arrangement, the manufacturing units will be able to ensure quick supply and in turn will get their payment in time. The drug testing laboratories will also do the testing of the samples sent by the manufacturers on our behalf so that proper supply chain is maintained .We are enclosing the rates of empanelled labs and the manufacturers will directly pay to the empanelled labs their charges of testing. Manufacturers can also see these rates and addresses of laboratories on the website www.health.mp.gov.in
