For Sr num -4-(MS004) Sanitary Napkin- Adolescent Girls Programme the bid is cancelled.

The Physical copy of the technical bid only should be submitted to this office by 28-11-15 till 12:00 pm.

S.Num	Quaries	Clarifications
01	Performance security should be reduced to 5% instead of 10 %	Not considered
02	For NS-1 dengue kit and RTPCR kit ,Syphilis kit and salt testing kit authorized dealer/distributor of a manufacturer should be allowed to participate	Considered
03 (RTPCR Kit)	In RTPCR kit –1-(8,000 reactions should be considered as quantity) 2-Viral RNA extraction kit -2000 samples should be considered as quantity 3- RTPCR ‘plates and optical seal’ –(compatible with ABI 96 well in PCR machine),quantity should be 100 plates 4- In Reagents name-Point num 3-Microamp optical 8 well cap strips-“tubes (0.2ml and 0.1 ml) in should be deleted	Yes considered Yes considered Yes considered Yes considered

04 (syphilis kit)	<p>1- Technical Specifications of Treponemal -specific Rapid (Point-of-Care) Diagnostic Test for Syphilis.</p> <p>Query : The Rapid Test kit is non-specific</p> <p>2- The assay should quantitatively detect total anti-treponemal antibody (IgG and IgM) in whole blood, serum or plasma for serological diagnosis of syphilis in all stages of infection.</p> <p>Query : Rapid Test cannot be quantitative</p> <p>3- The assay should have an in-built positive and negative control for testing the validity of the test kits. The assay should have reactive and non-reactive controls with each kit in adequate volume (minimum 10% of pack size).</p>	<p>Clarification : 1-Treponemal Specific Rapid Diagnostic Test means Treponemal Test as also specified in point no. 1 of specification as under. The assay should have solid phase coated with synthetic or recombinant type of Treponema Pallidum antigens</p> <p>2- Clarification : Quantitative means not dilutions but the strip should be able to detect total antibodies both IgG and IgM) which then allows the clinicians to detect syphilis of all stages. The test should be qualitative in nature and there is no need for quantitative test. The sensitivity and specificity would be as per point no. 10 of specifications as under.</p> <p>The assay should have sensitivity of 90% or more and specificity of 95% or more and the same should be supported by statements in kit insert and certificate from National Institute of Biological Sciences.</p> <p>3- The condition remains unchanged.</p>
05(Salt testing kit)	In salt testing kit quantity is too high.	salt testing kit quantity is reduced to 5,00,000 kits.
